

## Tomato Powder Production Line

### **DESCRIPTION**

With years of research and development, our company had successfully designed several production lines for processing tomato into powder , and gained high comments from our customer.

Refer to tomato process from fresh tomato to tomato powder , there are two ways :

1.one way is to use qualified fresh tomato ,and then cut them into slice ,and then dry. finally, choose micro-particle grinder to process dry tomato slice into powder

2.The other way is to broken the fresh and qualified tomato into slurry ,and use vacuum concentrator to concentrate them ,finally,use spray dryer to process tomato liquid into powder . currently , this way is very popular for tomato powder in industry .

### **The process procedures**

- Raw material selected
- Washing
- Breaking tomato into slurry
- Filtering the slurry
- Concentrate the slurry by Vacuum concentrator
- Homogenizing the slurry
- Dry the slurry by spray dryer
- Packing the qualified product.

Our production line is made on request , we warmly welcome customers who are interested in this line to visit us for more discussion.
